◀ Auto focus

MT Pro can be configured to start a measurement from Auto Focus function. The Auto Focus function can eliminate the difference on each fibre channels. Further more, with Auto Focus function, the measurement procedure is significantly simplified, especially for APC connectors.

Quick Auto Focus

◀ Auto calibration with reference mirror

MT Pro applies reference mirror to calibrate the instrument automatically and maintains the peak performance at all conditions. Compared with manual tuning stage and data compensation, the auto calibration is quick and accurate.

Fast and accurate
calibration

◀ Unique Frame Mounting Fixture for MT Ferrule

Dimension uses its patented frame mounting fixture to hold the MT ferrules to be tested.

- 1.The frame mounting fixture for MT ferrule is compatible with MT4, MT8, MT12, MT16, MT24, MT32, MT48 and MT72. Only one fixture is needed to test all MT ferrules.
- 2.Committed accuracy and repeat-ability for Ferrule angle measurement .
- 3.Endurable and long life time fixture.
- 4.Safe to PIN hole of DUT.
- 5.Helpful to analyze the accuracy of polishing jig.

◀ Quick switch between 0° and 8° fixtures

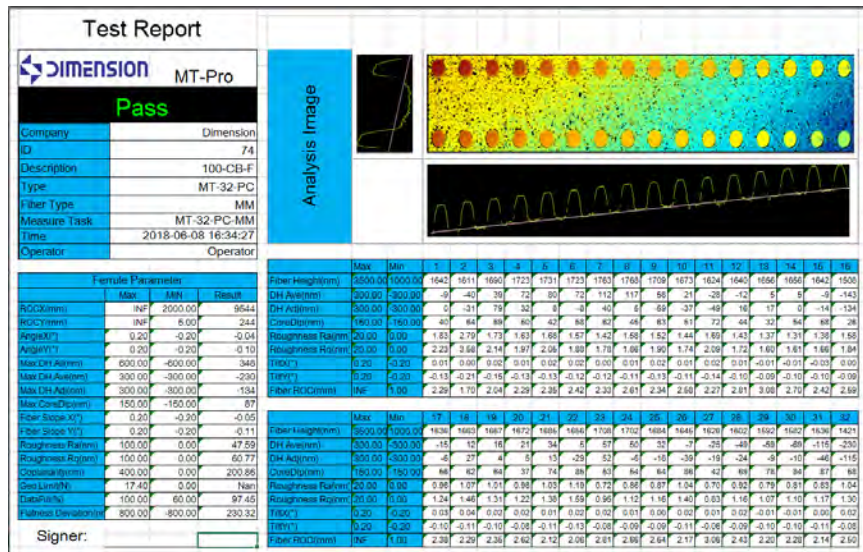

With the special designed fixture platform, 0° and 8° fixtures can be switched quickly. No extra calibration is needed. The high repeat-ability and reproducibility are guaranteed. The fixture platform is compatible for all types of MT/MPO PC and APC products.

Quick switch between PC and APC

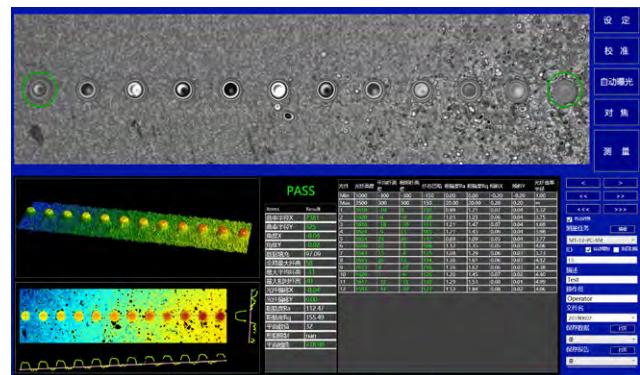

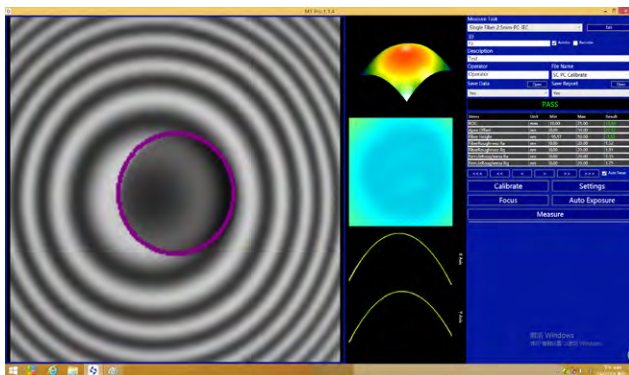

One click operation

Only one clicking is needed to complete the whole measurement procedures, including auto focus, scanning, analysis and all calculations. The testing report will be ready in seconds.

Intuitive software interface and excellent 3D rebuilding

MT Pro applies intuitive and modularized software interface. The real time image, 3D profile, cross section, roughness and testing results are displayed in the user interface. The operation and configuration are convenient and user-friendly. Single/Multi-Channel measurement with one-click switching.

The details of the 3D profile visualize the polishing result and helps to analyze and improve the polishing process.
